Sigma

Reg. No. 5,403,799

Registered Feb. 20, 2018

Corrected Jul. 16, 2024

Int. Cl.: 7, 9, 39, 40

Service Mark

Trademark

Principal Register

KAESER KOMPRESSOREN SE (GERMANY SE)

Carl-Kaesser-Straße 26

96450 COBURG

GERMANY

CLASS 7: Machine tools and mechanical apparatus for the generation of compressed air, vacuum pressure and air flow, namely, compressed air pumps, vacuum pumps, hoses and filters; compressors for machines, namely, reciprocating compressors and screw compressors; blowers for the compression, exhaustion and transport of gases; blowing machines, namely, centrifugal blowers, electric blowers for motors and engines, rotary blowers, axial flow blowers; air suction machines; vacuum pumps being machines; machine parts of air compressors, vacuum pumps and blowers, namely, central screw compressor units and central reciprocating compressors; air compressors; pneumatic transporters; compressed air machines; compressed air machine motors; compressed air pumps; compressed air vessels being parts of machines; pressure tanks being parts of machines; pumps being parts of machines, motors or engines; turbines, other than for land vehicles; machine tools for the compression, exhaustion and transport of gases; pneumatic tools, namely, pneumatic hammers, pneumatic chisels, pneumatic drills; filters for compressed air machines, motors and engines; air filters for motors and compressors; catalytic converters for the adsorption of hydrocarbon vapors; activated carbon absorbers for air compressors and general industrial use, and catalytic converters being parts of machines; activated carbon filters for use in compressed air systems, being parts of machines; high pressure filters being parts of machines; condensate separators being parts of machines; vacuum cleaners; cooling radiators for motors and engines; coolers for motors, compressor machines or blowers, namely, cooling radiators and cooling pumps; air condensers; condenser installations, namely air-condensers and air-cooled condensers; de-aerators being parts of machines; oil separators and de-oilers for separating oil from air being parts of machines; fittings for compressors and machines, namely, condensation separators, drain taps, dryers, coolers, anti-vibration mountings, controls, pumps, starter and protection panels, electric motors and pipes; fittings for steam engine boilers; taps being parts of machines or motors; mechanical seals being parts of machines; compressed air main charging systems comprised of control devices for the regulation of compressed air being parts of machines; compressed air reservoirs being parts of machines; regulators being parts of machines; speed governors for machines and motors; pressure regulators being parts of machines; pneumatic controls for machines and motors; motors, other than motors for land vehicles; electric motors, other than for land vehicles; generators of electricity;

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

machine housings, namely, housings for compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; mounts for machines, namely leveling mounts for machines; stands for machines; tables for machines, namely, tables specially adapted to hold powered machinery; couplings and driving belts for machines, other than for land vehicles; gear boxes, other than for land vehicles; ball-bearings for use in compressed air machines; shaft couplings as parts for machines; cranks being parts of machines; crank shafts for the compression, exhaustion and transport of gases; machine wheels; axles for machines; pump diaphragms; air compressors, namely, superchargers; turbo air compressors; fans for motors; anti-pollution devices for motors and compressors, being parts of machines and motors; heat exchangers being parts of machines; pneumatic, hydraulic and mechanical controls and pneumatic, hydraulic and mechanical regulators, all being parts of machines, for compressors, blowers or vacuum pumps

CLASS 9: Electric and electronic controls for air compressors, air blowers, vacuum pumps, and air treatment apparatus and air treatment devices, namely, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators; electric and electronic regulating devices for regulating gas flow of compressors, blowers, vacuum pumps, and air treatment apparatus and air treatment devices, namely, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators; electric and electronic control apparatus and devices for process control, machine control and remote control of industrial processes; measuring devices for air treatment technology, automatic time switches, automatic weighing machines; data processing and acquisition equipment, devices and apparatus, all solely as peripheral devices or for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow or for the treatment of compressed air; computer programs recorded on data carriers and in data memories, namely, software for industrial automation and for operating, controlling, monitoring, sequencing, protecting and maintaining air compressors, air blowers, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators, all solely for peripheral devices or for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow or for the treatment of compressed air; computer installations, namely, computer hardware, solely as peripheral devices or for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow or for the treatment of compressed air; computer output equipment, namely, printers, recorders for data capture, plotters, terminals, screens, other visual display units, solely as peripheral devices or for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow or for the treatment of compressed air; apparatus and devices for data transmission, solely as peripheral devices or for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow or for the treatment of compressed air; electrotechnical and electronic user interface apparatus and devices, namely, electric control panels; sensors for the acquisition of physical quantities, namely, the pressure, temperature, voltage, power consumption, amplitude of vibration, operation time, humidity and flow rate of air and other gases; devices for the recording, transmission and reproduction of sound, images and data

CLASS 39: Distribution and supply of compressed air for third parties

CLASS 40: Generation of energy and of compressed air; consultancy services for third parties in the field of generation of energy and of compressed air; air purification; air freshening and air conditioning in the nature of air deodorizing and air purification services; rental and leasing of installations serving the generation and supply of energy and of compressed air; generation of compressed air for third parties; all of the foregoing services excluding industrial air conditioners

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

PRIORITY DATE OF 09-19-2013 IS CLAIMED

OWNER OF INTERNATIONAL REGISTRATION 1235616 DATED 03-14-2014,
EXPIRES 03-14-2034

SER. NO. 79-160,385, FILED 03-14-2014

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
